Term 1 Checklist: Cells

Topic	Learning Outcomes	RAG Yourself	
		1	2
Cells	Draw a labelled diagram of an animal cell including: membrane, nucleus and cytoplasm		
	Compare plant and animal cells using a diagram		
	Describe the role cell organelles e.g. membrane, nucleus, cytoplasm, mitochondria		
	Label a diagram to show the parts of a microscope		
	Define specialised cell		
	Identify specialised cells of plants and animals from a diagram		
	Explain how the adaptations of specialised cells are linked to their function		
	Order the levels of organisation in organisms		
	Describe how cells make tissues and tissues make organs		
	State the function and location of key human organs		
	Give three reasons why cell division takes place		
	Sequence the stages of cell division
