Term 1 Checklist: Induction

Topic	Learning Outcomes	RAG Yourself	
		1	2
Y6 Induction	Link the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit		
	Show how circuit components work, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches		
	Use symbols when representing a simple circuit in a diagram e.g. bulbs and switches		
	Recognise that living things have changed over time and that fossils provide information about living things		
	Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents		
	Identify how animals and plants are adapted to suit their environment		
	Explain that unsupported objects fall towards the Earth because of the force of gravity		
	Identify the effects of air resistance, water resistance and friction		
	Describe the changes as humans develop to old age		
	Identify the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood		
	Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function		
	Describe the ways in which nutrients and water are transported within animals, including humans		
	Recognise that light appears to travel in straight lines		
	Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes		
	Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them		
	Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird		
	Describe how plants reproduce		
	Describe how animals reproduce		
	Describe how living things are classified into groups according to common characteristics
