Term 2 Checklist: Cells

Topic	Learning Outcomes	RAG Yourself	
		1	2
Cells	Draw a labelled diagram of an animal cell including: membrane, nucleus and cytoplasm		
	Compare plant and animal cells using a diagram		
	Describe the role cell organelles e.g. membrane, nucleus, cytoplasm, mitochondria		
	Label a diagram to show the parts of a microscope		
	Define specialised cell		
	Identify specialised cells of plants and animals from a diagram		
	Explain how the adaptations of specialised cells are linked to their function		
	Order the levels of organisation in organisms		
	Describe how cells make tissues and tissues make organs		
	State the function and location of key human organs		
	Give three reasons why cell division takes place		
	Sequence the stages of cell division		
	Compare animal and bacterial cells		
	Describe a method to test the levels of bacteria on different surfaces		
	Explain why toothpaste contains anti-bacterial chemicals		
	Define communicable disease		
	State the types of organisms which cause disease		
	Suggest ways we can prevent the spread of communicable diseases		
	Give examples of ways the human body can prevent infection		
	Explain how vaccines can be used to reduce the spread of some diseases		
	Describe the importance of cellular respiration		
	Give the word equation for aerobic respiration		
	Explain why some specialised cells have more mitochondria than others		
	Explain why a yeast solution "bubbles" when sugar is added to it		
	Describe the role of muscles and bones		
	Explain how your arm moves in terms of antagonistic pairs of muscles		
	Describe the effects of exercise on heart and breathing rate		
	Explain why heart rate must increase during intense exercise
