Term 2 Checklist: Energy

Topic	Learning Outcomes	RAG Yourself	
		1	2
Energy	Name the different forms of energy store e.g. kinetic, thermal		
	Describe the difference between energy stores and transfers		
	State the four ways energy can be transferred		
	Draw energy transfer diagrams for a candle, a catapult and a TV		
	Identify useful and wasted energy in an energy transfer		
	Calculate the percentage efficiency of an energy transfer		
	Describe the difference in terms of energy transfer of an efficient device and a less efficient device		
	State the meaning of "non-renewable"		
	State the tree types of fossil fuel and describe their uses		
	Explain how fossil fuels are used to generate electricity in a power station		
	Define what a renewable energy resource is		
	State examples of renewable energy resources e.g. solar, wind		
	Explain how solar, wind and tidal resources work in terms of energy transfer		
	Compare the advantages/disadvantages of renewables and fossil fuels		
	Draw a diagram showing the carbon cycle		
	Describe how human activities have effected the carbon cycle		
	Describe how carbon dioxide causes a greenhouse effect		
	Explain how human actions have contributed towards global warming		
	List some impacts of global warming		
	Name the three most common gases in our atmosphere		
	State the approximate percentage of each gas in our atmosphere		
	Describe two processes that have caused the atmosphere to change over time		
	Draw a diagram to show how to measure the energy in food		
	Describe the term "sustainable food production"		
	Describe advantages and disadvantages of a vegan diet		
	Describe the difference between organic and intensive farming		
	Describe advantages and disadvantages of organic farming
