Term 3 Checklist: Chemicals

Topic	Learning Outcomes	RAG	
		1	2
Chemicals	Describe what an element is in terms of types of atoms		
	Describe how a molecule is formed from atoms		
	Compare chemical compounds to mixtures		
	Explain why chemical compounds are hard to separate		
	Draw particle diagrams of the three states of matter: solids, liquids and gases		
	State the physical properties of the three states of matter		
	Compare the kinetic energy of particles in different states of matter		
	Explain why solids and liquids cannot be compressed easily, but gases can		
	Identify the four main changes of state		
	Describe what happens to the particles in a substance during a change of state		
	List a range of common household acids and bases		
	Describe how litmus paper can be used to test acids and bases		
	Describe how universal indicator can be used to test acids and bases		
	Match colours to numbers on the pH scale		
	Compare how useful different pH indicators are		
	Describe what a neutralisation reaction is		
	Give the chemical equation for a neutralisation reaction
