Term 5 Checklist

Topic	Learning Outcomes	RAG	
		1	2
Forces and Motion (Revision)	Describe the difference between contact and non contact forces		
	State a range of contact and non-contact forces		
	Draw force arrows on objects that are at rest or moving		
	Calculate the resultant force of an object when two forces are acting on it		
	Explain why an object will start to accelerate using the idea of forces		
	Explain why an object will travel at a steady speed using the idea of forces		
	State the units of mass and weight		
	Explain why your weight changes on different planets but your mass does not		
	"Calculate your mass or weight. Try this one: Earth's gravity is 9.8N/kg, Mr Wormstone has a mass of 78kg. What is his weight?"		
Chemicals (Revision)	Describe what an element is in terms of types of atoms		
	Compare chemical compounds to mixtures		
	Explain why chemical compounds are hard to separate		
	List a range of common household acids and bases		
	Describe how litmus paper can be used to test acids and bases		
	Describe how universal indicator can be used to test acids and bases		
	Match colours to numbers on the pH scale		
	Compare how useful different pH indicators are		
	Describe what a neutralisation reaction is		
	Give the chemical equation for a neutralisation reaction		
	Identify common scientific warning labels e.g. irritant, corrosive, toxic		
	Define the key terms; solution, solvent, solute and soluble		
	Draw a particle diagram to show how a solution is formed		
Electricity (New content)	Describe how charged particles interact		
	Describe what causes static electricity		
	State which particle moves in an electrical current		
	Compare electrical conductors and insulators		
	Use a simple model to describe the difference between current and potential difference (voltage)		
	State the units of current and potential difference		
	Explain why current is the same at all points in a circuit		
	Explain why some materials conduct electricity		
	Describe the difference between a series and parallel circuit (Set 1)		
	Calculate the current in a series and parallel circuit (Set 1)		
	State how to measure current and potential difference		
	Draw complete circuit diagrams using a rule, pencil and straight lines		

	Draw a range of common circuit symbols e.g. wire, voltmeter, bulb		
	Describe the difference between AC and DC and give an example of the use of each		
	Calculate the cost to run an electrical appliance		
	Discuss how to reduce electricity costs in the home		
Interdependence (New content)	Draw a food chain and web for a described feeding relationship		
	Identify producers, consumers and decomposers in a feeding relationship		
	Predict the effect of an environmental change on a food web		
	State the resources that animals and plants compete for		
	Explain why some animals are more successful competitors		
	Describe how plants can spread their seeds and why it's important		
	Describe the role of pollen and how plants reproduce		
	Explain how pollinators are useful to humans		
	Describe the role of pesticides in farming		
	Explain how bioaccumulation of pesticides occurs		
	Describe how an observational survey is conducted
