Term 5 Checklist: Electricity

Topic	Learning Outcomes	RAG	
		1	2
Electricity	Describe how charged particles interact		
	Describe what causes static electricity		
	State which particle moves in an electrical current		
	Compare electrical conductors and insulators		
	Use a simple model to describe the difference between current and potential difference (voltage)		
	State the units of current and potential difference		
	Explain why current is the same at all points in a circuit		
	Explain why some materials conduct electricity		
	Describe the difference between a series and parallel circuit (Set 1)		
	Calculate the current in a series and parallel circuit (Set 1)		
	State how to measure current and potential difference		
	Draw complete circuit diagrams using a rule, pencil and straight lines		
	Draw a range of common circuit symbols e.g. wire, voltmeter, bulb		
	Describe the difference between AC and DC and give an example of the use of each		
	Calculate the cost to run an electrical appliance		
	Discuss how to reduce electricity costs in the home
