Term 6 Checklist: Interdependence

Topic	Learning Outcomes	RAG	
		1	2
Interdependence	Draw a food chain and web for a described feeding relationship		
	Identify producers, consumers and decomposers in a feeding relationship		
	Predict the effect of an environmental change on a food web		
	State the resources that animals and plants compete for		
	Explain why some animals are more successful competitors		
	Describe how plants can spread their seeds and why it's important		
	Describe the role of pollen and how plants reproduce		
	Explain how pollinators are useful to humans		
	Describe the role of pesticides in farming		
	Explain how bioaccumulation of pesticides occurs		
	Describe how an observational survey is conducted		
	Evaluate how useful an observational survey is		
	Describe how to measure biodiversity using a quadrat		
	Explain why biodiversity is important		
	Give the word equation for photosynthesis		
	Explain how plants are adapted for photosynthesis		
	Describe the roles of different plant structures e.g. leaves, roots, stems, flowers		
	Describe how acid rain is formed from burning fossil fuels		
	Explain how acid rain affects ecosystems		
	Explain the importance of large herbivores in rewilding projects		
	Describe what is meant by a keystone species		
	Compare vertebrates and invertebrates		
	State the general features of the five major vertebrate groups		
	Create a key which can be used to classify different species		
	Describe what it means for an animal to be adapted to its environment		
	Describe the process of evolution by natural selection		
	Compare different meanings of extinction		
	Describe different theories that explain the extinction of the dinosaurs
