Term 6 – Human Body

This is a checklist of all of content from the **human body** topic that you could be assessed on in **term 6.**

Remember the strategy - **Identify** a weakness --> **Learn** it --> **Test** it.

Start by RAGing your understanding for each of the outcomes below. Then focus on learning each of the **red** and **amber** outcomes before **testing yourself.**

Topic	Learning Outcomes	RAG Yourself	
		1	2
Human Body	Draw labelled diagrams of plant and animal cells		
	Explain the importance of mitochondria in cells		
	Define diffusion and give examples of diffusion in the human body		
	Explain why starch is an important storage molecule		
	Describe how to perform an iodine test for starch and interpret the results		
	Name the major digestive organs and describe their functions		
	Describe the order food travels through the digestive system		
	Describe where chemical and mechanical digestion take place		
	Explain the importance of digesting the food we eat		
	Label the main parts of the lungs on a diagram		
	Explain the adaptations show by the alveoli		
	Explain the effect of smoking on lung function		
	Explain how breathing works in terms of pressure in the chest
