Term 6 – Periodic Table

This is a checklist of all of content from the **periodic table** topic that you could be assessed on in **term 6.**

Remember the strategy - **Identify** a weakness --> **Learn** it --> **Test** it.

Start by RAGing your understanding for each of the outcomes below. Then focus on learning each of the **red** and **amber** outcomes before **testing yourself.**

Topic	Learning Outcomes	RAG Yourself	
		1	2
Periodic Table	Identify elements from the formula of a compound		
	Identify numbers of different atoms in compounds from a formula		
	Describe what a semi-metal is		
	Describe the properties of the transition metals		
	Use electronic structure to explain reactivity		
	Explain why you float in very salty water		
	Identify the group and period of an element on the periodic table		
	Draw a labelled diagram of an atom including: nucleus, protons, neutrons, shells and electrons		
	State the charge of the three subatomic particles		
	State the names of groups 1, 2, 7 and 8 of the periodic table		
	Explain why displacement reactions occur		
	Describe the test and positive results for the gases: hydrogen, chlorine, carbon dioxide and oxygen		
	Describe how to collect gases using a submerged measuring cylinder
