Term 6 Checklist: Restless Earth

Topic	Learning Outcomes	RAG	
		1	2
Restless Earth	Describe the transfer of heat through conduction, convection and thermal radiation		
	State the order of the planets in the Solar System		
	Explain why Pluto is no longer regarded as a planet		
	Describe the steps involved in the formation of the solar system from a gas cloud		
	Describe the Earth's orbit around the Sun		
	Describe the moon's orbit around the Earth		
	State the length of a day, lunar month and solar year		
	Explain how the tilt of the Earth is linked to seasons		
	Describe what is meant by an axis of rotation		
	Explain why it is Summer in the Northern hemisphere when it is Winter in the Southern hemisphere		
	Describe some impacts on the environment of a large asteroid impact		
	Explain why an asteroid impact can both cool or warm the Earth's atmosphere		
	Explain why Venus has higher average temperatures than Mercury		
	Describe the greenhouse effect using a diagram		
	Compare longitudinal and transverse waves		
	Draw a diagram showing the compression and rarefactions in a longitudinal wave		
	Define parallel and perpendicular		
	State the 7 parts of the electromagnetic spectrum		
	Describe the properties shared by all electromagnetic waves		
	Label wavelength and amplitude on a transverse wave		
	Describe the relationship between the frequency and wavelength of a wave		
	Draw diagrams to show how the pitch and volume of a sound affects the shape of the wave		
	Use a protractor to measure an angle of reflection		
	State the law of reflection		
	Label a diagram of the internal structure of the Earth		
	Explain why earthquakes happen due to tectonic plate movement		
	Describe how sedimentary, igneous and metamorphic rocks are formed
