predator .....

prey of this predator .....

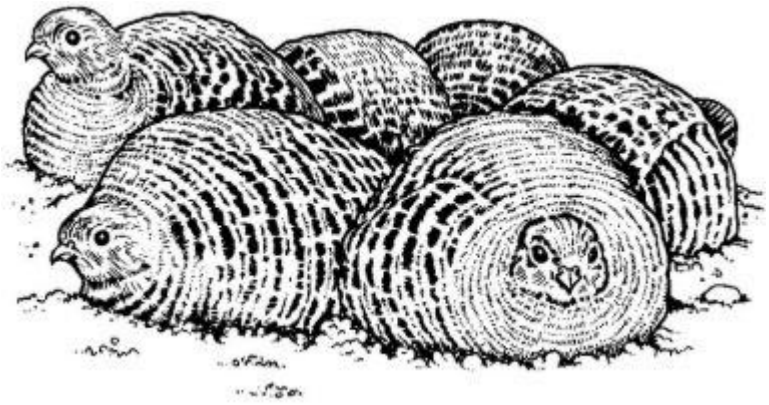

1 mark

(c) Why are the plants in the food web called producers?
Tick the correct box.

They loose their leaves in the autumn.	☐	They make food by photosynthesis.	☐
They have very long roots.	☐	They have very small flowers.	☐

1 mark

(d) The drawing below shows how partridges sit close together and all face outwards.

Give **one** reason why sitting close together like this helps the partridges to survive.

.....

.....

1 mark

(e) Partridges lay their eggs in nests on the ground.

(i) The eggs are the same colour as the ground.
Why can this help partridges to survive?

.....

.....

1 mark

(ii) Why could laying eggs on the ground result in fewer partridge chicks?

.....

.....

1 mark
maximum 7 marks

Q1.

(a) (i) grasshopper

1 (L3)

(ii) any **one** from

- they eat the plants
- the insects eat them
  accept 'they eat them'

1 (L4)

(b) any **one** from

- *predator:* partridge *prey:* grasshopper **or** snail
- *predator:* fox *prey:* partridge
- *predator:* stoat *prey:* partridge
  ***both** the predator and its prey are required for the mark*

1 (L4)

(c) They make food by photosynthesis. ✓
if more than one box is ticked, award no mark

1 (L4)

(d) any **one** from

- they can see predators **or** foxes **or** stoats
- it keeps them warm

1 (L3)

(e) (i) any **one** from

- fewer will be found by predators
  *accept 'they will not be seen' **or** 'they are camouflaged'*
- fewer will be eaten
  accept 'they will not get eaten'

1 (L4)

(ii) any **one** from

- they may be trodden on **or** damaged
- predators can get to them easily
  accept 'they can be found easily'

1 (L3)
