Q1. (a) Neutral litmus paper is:

purple in neutral solutions;
red in acids;
blue in alkalis.

Use this information to answer the questions.

(i) A piece of neutral litmus paper turned red in some grapefruit juice. What does this show about the grapefruit juice?

.....

1 mark

(ii) Gwen added drops of sodium hydroxide solution to the grapefruit juice. The litmus paper soon turned blue. What does the blue colour show about the sodium hydroxide solution?

.....

1 mark

(iii) Gwen then tested some water with a new piece of neutral litmus paper. The pH of the water was 7. What colour was the litmus paper in the water.

.....

1 mark

(b) What name is given to the reaction between an acid and an alkali?

Tick the correct box.

distillation ☐

neutralisation ☐

precipitation ☐

separation ☐

1 mark

Maximum 4 marks

Q1.

(a) (i) acid **or** acidic

accept 'has acid in it'

*do **not** accept 'more acid than alkali'*

1 (L3)

(ii) alkali **or** alkaline

accept 'it neutralises acid'

*do **not** accept 'turns the acid into an alkali'*

1 (L3)

(iii) purple

1 (L3)

(b) neutralisation ✓

if more than one box is ticked, award no mark

1 (L4)
