Q1.

(a) The drawing below shows a fish.

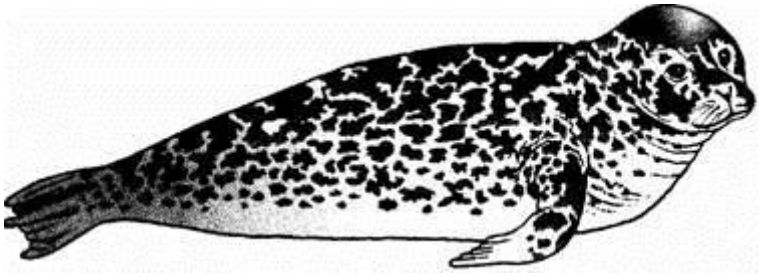

Four parts of a fish are written in the list below. Draw a line from each part to the way it helps a fish to live in water. Draw only **four** lines.

part of a fish	**how the part helps a fish to live in water**
	• absorbs oxygen from the water
tail •	
	• helps the fish to detect its food
gills •	
	• protects the body of the fish
scales •	
	• pushes the fish forward
fins •	
	• stops the fish rolling over

4 marks

(b) The drawing below shows a seal

Seals are mammals. They can swim under water but they have to come to the surface to get oxygen from the air.

(i) Why can seals **only** get oxygen from the air?

.....

1 mark

(ii) Give **one** way that a seal is adapted for swimming.

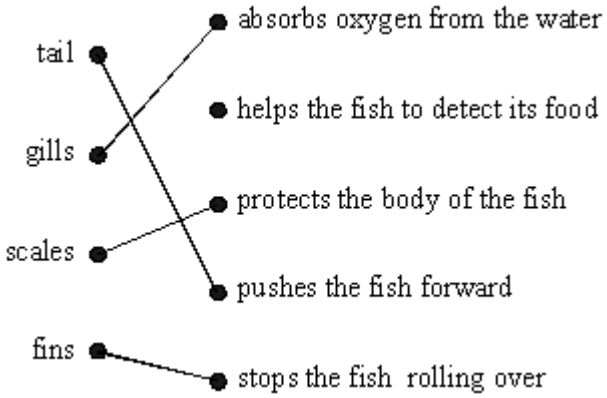

.....

1 mark

Maximum 6 marks

Q1.

(a)

if more than one line is drawn from any part, award no mark for that part

4
