(a) Photosynthesis takes place in the leaves of the blackberry plant. Complete the word equation for photosynthesis.

water + carbon dioxide → ..... + oxygen

1 mark

(b) Jonathan studied a blackberry plant growing in a shady place and a blackberry plant growing in a sunny place.

(i) Jonathan found that the plant in the shady place had larger leaves. Why is it an advantage for plants in the shade to have leaves with a large surface area?

.....

.....

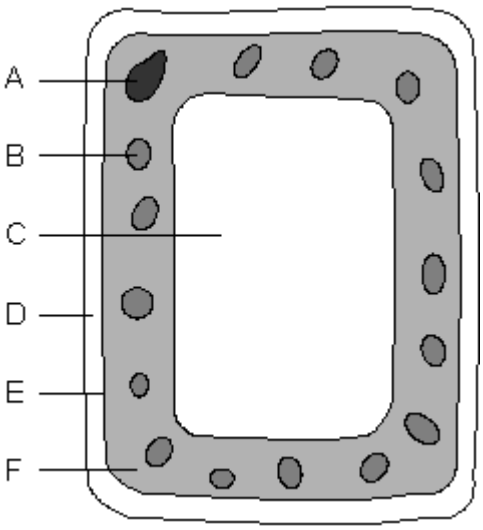

1 mark

(ii) Both blackberry plants had green leaves. What part of the leaf cells makes the leaf green?

.....

1 mark

(c) The diagram below shows a cell from a leaf of a blackberry plant.

The names of four parts of the cell are listed in the table below.

(i) Match the name of each part with a letter from the diagram. Write your answers in the table.

part	letter of part
cell wall	
cytoplasm	
nucleus	
vacuole	

4 marks

(ii) Which **two** of the labelled parts are also present in an animal cell? Give the correct letters from the diagram.

..... and .....

2 marks

Maximum 9 marks

Q1.

(a) glucose

accept 'sugar' ***or*** *'carbohydrate'*

1 (L6)

(b) (i) to absorb enough **or** more light

accept 'to absorb as much light as possible'

accept 'to absorb lots of light'

accept 'more photosynthesis takes place'

1 (L6)

(ii) chloroplasts

accept 'chlorophyll'

1 (L6)

(c) (i)

part	***letter of part***
cell wall	D
cytoplasm	F
nucleus	A
vacuole	C

4 (L5)

(ii) any **two** from

- A
- E
- F

2 (L5)
