Q1.

Indra collects samples of **three** gases.

She carries out the following tests.

1. She adds a few drops of limewater to one test tube of each gas and shakes it.

2. She puts a burning splint (spill) into the other test tube of each gas.

Complete **each box** in the table below to describe the results of her tests.
If there is no effect, write 'no effect'.

gas	effect of the gas on limewater	effect of putting a burning splint into the gas
carbon dioxide		
oxygen		
hydrogen		

Maximum 6 marks

Q1.

gas	effect of the gas on limewater	effect of putting a burning splint into the gas
carbon dioxide	* it goes milky **or** cloudy **or** white or murky	* goes out
oxygen	* no effect	* burns more brightly **or** flares up **or** burns quicker
hydrogen	* no effect	* the gas lights **or** burns

*do **not** accept a box which is left blank, i.e. this does **not** imply 'no effect'*

*do **not** accept 'nothing' in the right hand column*

*do **not** accept 'relights' **or** 'keeps burning' **or** 'stays alight' **or** 'explodes' in the right hand column*

*accept 'pops' **or** 'squeaks' **or** 'explodes' in the right hand column*
