Q1.

(a) The diagram below shows a ray of red light entering a glass block.

(i) Most of the light goes into the glass block, but some does not.
What happens to the light which does **not** go into the glass block?

.....

.....

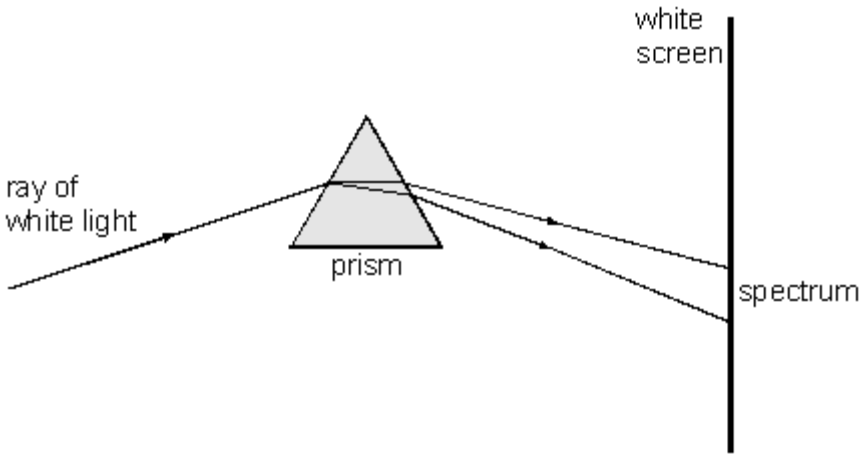

1 mark

(ii) As the light goes into the glass block, it changes direction.
What is the name of this effect?

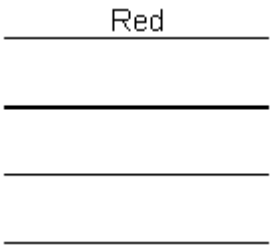

.....

1 mark

(b) The diagram below shows white light passing through a prism and forming a spectrum on a white screen.

The spectrum contains light of all colours. Red is at one end of the spectrum. Write **blue**, **green** and **violet** below in the order of the spectrum.

1 mark

(c) A pupil puts a green filter in the ray of white light. What happens to the spectrum on the screen?
Tick the correct box.

The whole spectrum turns green. ☐

The green part of the spectrum disappears, but the other colours stay the same. ☐

The green part of the spectrum stays the same, but the other colours disappear. ☐

The whole spectrum disappears. ☐

Q1.

(a) (i) any **one** from

- it is reflected
  accept 'bounces off'
- it is scattered
  accept 'it is absorbed by the air'
  *do **not** accept 'it is absorbed by the glass'*
  ***or** 'it is absorbed' **or** 'it goes into the air*

1 (L5)

(ii) refraction

1 (L5)

(b) green
blue
violet

***all three** colours in the correct order are required for the mark*

accept 'orange, yellow, green, blue, indigo, violet' in the correct order

1 (L5)

(c) The green part of the spectrum stays the same, but the other colours disappear. ✓

i.e. a tick in the third box if more than one box is ticked, award no mark

1 (L6)
